This application form should only be completed if the broadband service to the premises (if available) cannot deliver a step change in service provision of at least twice the current download speed. Your proposed service must ensure an absolute minimum download speed of at least 10Mbps. Please refer to the Eligibility Criteria and Scheme Conditions for further clarification.

Please write clearly and tick the boxes as appropriate.

Please use black typescript or black ink.

Please ensure you have read our Eligibility Criteria and Scheme Conditions leaflet.

The Access Broadband Cymru scheme provides support for the eligible costs of alternative broadband solutions. To receive funding, premises must be able to evidence their new grant supported broadband connection has provided the necessary step change with an absolute minimum download speed of at least 10Mbps. The Superfast Cymru programme is also delivering superfast broadband across Wales. **Prospective grant applicants should consider that they may be able to benefit from more preferable terms and conditions once competitive options are available following an upgrade in their area under Superfast Cymru.**

You should only apply for grant funding under Access Broadband Cymru if you are certain that you have chosen the solution which best suits your needs for the full term of your obligation to your service provider.

Please use the Eligibility Criteria & Scheme Conditions document for assistance in completing this form.
